

Welcome attendees to the Parks Professional Pathways

NATS Nursery Ltd. is very pleased to once again be the 3 Star Sponsor of this important event.

Our Vision and Expertise

Our company mission is to help provide and restore natural habitats for future generations to enjoy. With this in mind, one of our specialties is growing native plants for use by municipalities and our parks and grounds customers. Our plants are used for habitat construction, urban forestry, restoration and environmental beautification projects among other applications. We are experts in our field with over 34 years growing experience in Langley, BC.

NATS for Native Container Plants

NATS nursery is your native plant specialist. We produce excellent quality plant material for all of your projects, both large and small. Our finished products are available in 4" to 20 gallon containers and some B & B. If you are looking for smaller plants, please also see our Starter Plants (plugs) at www.natsnursery.com.

Our expert staff is always available to answer your questions and help you pick the “right plant for the right place.” We work on projects of all spectrums and sizes, from highway greening, habitat restoration, low impact landscaping, urban forestry, environmental beautification and land reclamation, to urban forestry and green roofs.

It starts with a conversation... find out how NATS Nursery can work for “your” community.

Invasive Species ~ Not at NATS

NATS is a long time supporter of the Invasive Species Council of British Columbia. Invasive species entering BC are harmful to our local environment, economy and society. NATS does not propagate or sell invasive species. We encourage you to learn more about invasive species and consider getting involved with the Council. Please visit them at www.bcinvases.ca. Start making a difference today!

Other NATS Products:

NATS Moss Turf

NATS Moss Turf is a custom-grown and as easy to install as landscape turf. It can be used in place of grass in small areas or can be cut into pieces for in-between rocks and other garden applications.

Drought tolerant and easy to maintain, NATS Moss Turf is grown with soil on a coconut fiber mat for ease of handling and installation.

Contact Ron Jacobson at ron@natsnursery.com for availability and pricing.

NATS LiveRoof

In addition to native plants, NATS is also the BC grower and distributor of LiveRoof. LiveRoof is a fully grown modular green roof system. NATS LiveRoof 12" x 24" modules are grown to 95% coverage at our nursery before installation, resulting in a green roof that is completely established and instantly green. Contact Dean at dean@natsnursery.com for more details.

Permaloc

As a compliment to NATS LiveRoof or on its own as a stand alone edging product, Permaloc is the world's leading high-performance aluminum landscape edging and restraint system. NATS is BC's primary distributor of Permaloc. Contact Dean for availability and pricing.
